

APPROVED AS AMENDED: August 8, 2022

WEST WINDSOR TOWNSHIP COUNCIL
BUSINESS SESSION
June 13, 2022

CALL TO ORDER: President Gawas called the meeting to order at 7:00 p.m.

ROLL CALL: Gawas, Geevers, Mandel, Stevens, Whitfield

STATEMENT OF ADEQUATE NOTICE

This is to advise that the notice requirement provided for in the "Open Public Meetings Act" has been satisfied. Notice of this meeting was properly given and transmitted to The Times and Princeton Packet; filed with the Clerk of the Municipality; and posted in the West Windsor Township Municipal Building at North Post and Clarksville Roads on, January 7, 2022.

ATTENDEES: President: Gawas; Council: Geevers, Mandel, Stevens, Whitfield; Mayor: Marathe; Business Administrator: Schmid; Township Attorney: Herbert; Township Clerk: Huber

SALUTE TO THE FLAG

Ms. Huber led the salute to the flag.

CEREMONIAL MATTERS AND/OR TOPIC FOR PRIORITY CONSIDERATION

Mayor's State of the Township

Mayor Marathe presented his fifth State of the Township Address (see attached).

Council President Gawas introduced Mr. Ligeti of the Historical Society of West Windsor who spoke briefly about the 225th Anniversary Celebration events being held this year.

Members of Council and the Mayor signed a copy of the 1875 Township map which will hang in the Council Office in the Municipal Building.

PUBLIC COMMENT

During the public comment portion of the meeting the Zoom link was attacked with voices overriding all public comment as well

as lude pictures popping up. The Township Clerk with the assistance of the Chief of Police began removing these individuals from the meeting. With the continued attack the Chief and Clerk added additional security measures to the Zoom setup thereby stopping the attack. Due to this disturbance a good portion of the public comment was not audible. The Township Clerk sent a letter to all public participants at this portion of the meeting asking them to submit their comments to be made part of the record. Most of the residents who spoke that evening noted their concerns with the proposed warehouse development on Clarksville Road.

The following is a list of individuals who spoke at the meeting:

Ms. Sheely Kiernan, 420 Clarksville Road
Mr. Chris Lemmond, 10 Zeloof Drive
Ms. Arun Bhosle, 288 Clarksville Road (see attached)
Ms. Geetha Desikan, 27 Hereford Drive (see attached)
Ms. Lynda Levy, 6 Lancashire Drive (see attached)
Ms. Stacey Fox, 29 Berrien Avenue
Ms. Saurabh Bahl, 280 Clarksville Road
Mr. Chun Yo, 349 Clarksville Road
Mr. Ajay Kaisth, 20 Haskel Drive (see attached)
Mr Alex Mattson, 6 North Mill Road
Ms. Tirza Wahrman, 5 Stonelea Drive
Ms. Ana Lomba, & Mr. John Mulcahy, 2 Hereford Drive (see attached)
Mr. Khurram Waheed, 286 Clarksville Road (see attached)
Ms. Nicoofer Daebary, 19 Zeloof Drive
Ms. Veronica Mehno, 41 Glaston Drive (see attached)
Mr. John Hinsdale, 38 Quaker Road (see attached)

ADMINISTRATION COMMENTS

Ms. Schmid made the following announcements:

- Public Works in Zone 2
- COVID 19 Clinics 6/14, 6/23. 6/29 see web-site for details

*Arundhati "Arun" Bhosle, PE (NJ)
Geetha Vedanta Desikan
Padma Katapalli

Dear Town Council Members,

Good Evening, to every one present at this meeting today June 13, 2022.

This is with regards to Application no. PB21-15, Applicant: BridgePoint WW, LLC.

As residents of West Windsor township, we respectfully request the Town Council Members and PLANNING BOARD to consider OUR CONCERNS for the Welfare of the residents and RE-OPEN the meeting for public comments scheduled for June 29, 2022, with the Applicant, for the following reasons.

1. We request that the Township of West Windsor should consider creating a New Ordinance to prohibit trucks over four tons registered gross weight at ALL roads which lead the Schools located in West Windsor Township. In addition, in this new ordinance we request the Township to consider adding speed bumps and enforce speed limits within our town. I live on Clarksville Road and have noted how people are flying instead of driving, contributing to accidents not just on the major roads but local and internal roads. We, the residents are willing to work in conjunction with You, The Township for any matters pertaining to this cause including but not limited to obtaining the required INK signatures from concerned residents to SUPPORT this PETITION FOR THE NEW ORDINANCE and present them to higher authorities/jurisdictions including but not limited to Mercer County, NJDOT and NJDEP.
2. With reference to May 25, 2022 Planning Board Meeting with the Applicant, Planning Board questions to the Applicant were insightful. The curved ball thrown by the Applicant of re-routing the traffic to our town West Windsor is NOT acceptable. From referenced meeting, If NJDOT is limiting access to Route 1, and the Mercer County already have removed restrictions for the Applicant, they are now trying to clog our Town roads. It is evident that Traffic congestion by this warehouse has caught their attention based on the document published on Mercer County website that the Traffic increase would be 61.85% due to this site. This is like clogging the arteries for a massive heart attack and eventually death of this Town. Another way to look at it is, if NJDOT, the big boss is worried about this development then our footprint is so small that we will be crushed.
3. The proposed project is ONE of the Largest Warehouse Development in the entire State of New Jersey given the ginormous size of this development. As noted in prior public meetings, the inclusion of re-routing trucks to Clarksville Road was recently introduced by the Applicant. The Applicant has submitted Preliminary and Final Site Plan to the Planning Board. With *reference to WW Township e-Code 360 Part II, Article IV, Section 200-13: Preliminary Site Plan and 200-14: Final Site Plan*, , Site Plan and Submission Checklist dated April 7, 2022, the approval time for the Preliminary Site Plan is 3 years and Final Site is 2 years. In this case, site plan was dated December 3rd, 2021, shall we consider that approval deadline is Deadline December 2nd, 2023 for the Final Site Plan? Does this mean, we have time to get back to the Applicant?
4. We propose that the Planning board insists the Applicant to follow the Original plan submitted by the Applicant and connecting to Route 1. An overpass connecting to US Route 1 North and South, I-95 and I-295 can be a option. Other option to consider is railroads to minimize the ecological print. Amtrak railroad lines are located close to the Applicant site.

*Arundhati "Arun" Bhosle, PE (NJ)
Geetha Vedanta Desikan
Padma Katapalli

5. With regards to the Safety of the School children, it is our understanding that the Planning Board and the Township Engineers are coordinating their efforts with the Secretary of the School Board as noted in the e-code 360, Section 200-13 (d)(1)(m). However, when we reached out to Dr. David Aderhold, Superintendent of the WWP School District and he confirmed via email dated June 3, 2022, I quote *"I learned of Mr. O'Brien's comments last night and I reached out to the Mayor to voice my displeasure. My exchanges with Sam Surtees, Land Use, have been limited to a question about bus times. His inquiry came only in the last two weeks. No briefing has been provided to the school and no ongoing conversation about impacts have been had. The statements made about conversations with me are grossly overstated and a misrepresentation of fact. Clearly, truck traffic is concerning and problematic and would impact all ten schools. In my discussion with the Mayor it is my understanding that numerous restrictions are being placed on the property owners by the township. It is further my understanding that those restrictions are going to be made publicly available to review potentially as early as next week. If this is the case, I will review the materials and determine next steps for the district."* I unquote. This explains that it not just us, the town residents, but also the entire WWP school District is taken aback by this proposed development. Our SUVs and Sedans are like ants in front of this container trucks. Just to understand the impact of this development, we can drive to Elizabeth Seaport which is at Exit 13 A NJ-81 N and head over towards the PANYNJ office at 1106 McLeister St. and not to shop at IKEA . If that is far just head over to Cranbury and Turnpike intersection to get a short glimpse of what town will look like should we allow the Trucks. The impact of traffic congestion, air and noise pollution, and big-rig fatal accidents is far more than we can envision and before this infects us, not just our kids, but youth, adult and elderly alike. So, let's make a good decision towards the betterment of our historic town – Our West Windsor!
6. We are not traffic engineers however the traffic impact study references to land use code 150 for Warehousing by the Institute of transportation Engineering (ITE). However, it is understood that proposed uses are not yet clarified by the Applicant with regards to prospective tenants, hours of operations, staff, deliveries etc. A clarification on what factors were considered is a must as this will change once the proposal progresses and we will not have any means to control this data.
7. I'm reiterating this statement and I understand you have reviewed the letter sent by Langan Engineering dated May 31, 2022 on behalf of the applicant, titled Supplemental Traffic Submission, On the second page, fifth paragraph, I quote "should the Township in coordination with Mercer County agree to restrict truck traffic in the future from utilizing Clarksville Road" unquote the traffic impact study, I quote "from Route 1 north would not change the analyses results." Therefore, we respectfully request the planning board to restrict access in coordination with Mercer County.
8. The traffic impact Study was only done around US Route 1 and development intersections. Our request is that the Planning board including the Township Engineers ask the Applicant to perform a detailed analysis for the overall impact due to this development and NOT just limited to trucks not less than 5-mile radius from the Applicant's location. The report shall be detailed and address school safety, public health, traffic, environmental factors including noise, air pollution, land use and habitat fragmentation, global climate concerns and motor vehicle

*Arundhati "Arun" Bhosle, PE (NJ)
Geetha Vedanta Desikan
Padma Katapalli

accidents. With regards to point 2 above, it is evident that the State (NJDOT) has already envisioned this impact.

9. Last month a new project for warehouse on Rt. 571 was approved. There is also a concurrent construction going on at the property next to the Weichert Realtors. It is our request our Townships considers the traffic, environmental, safety and other factors from this new development and add as part of the study for the proposed development and re-evaluate the proposal for building this massive warehouse.
10. West Windsor Township holds a historical place in State of NJ, and you know that the Clarksville Village is part of the original villages here in West Windsor Township along with other local roads. People from neighboring states such as New York, Pennsylvania to name a few, come to settle for generations her in this suburban town of quality of life and school district. We request the Planning Board and the Town Council to maintain this serene lifestyle and urge to consider all factors affecting as follows but not limited to
 - safety of kids, walkers, pedestrians, and school bus,
 - WWP schools: all ten schools including Maurice hawk elementary & high school south,
 - Decrease in property values
 - Heavy traffic congestion for all commuters with exposure to increase in fatal big-rig accidents
 - Local, county and state roads - Clarksville rd., New village rd., Village rd., Penn Lyle rd., north post rd., rt. 571 (Princeton Hightstown rd.), Alexander rd., Washington rd., Quakerbridge Road, us-1, rt-206, i-95, i-295
 - Environmental impact and long-term public health issues especially with kids and senior residents
 - Commuting time to Princeton Junction train station
 - Neighboring townships: Princeton, Lawrenceville, Hamilton, Plainsboro, east Windsor, Cranbury, Robbinsville

Together as a Community We save West Windsor!

Reference: Timeline WW ECODE 360 - \$200-14: Final Site Plan –

- a. Time limit for final approval and extensions.
- b. (1) Final approval shall expire two years from the date of final approval unless the applicant has secured a building permit to commence construction. The Planning Board may extend final approval, and the protection offered under Subsection G above for one year. Up to three such extensions may be granted.
- c. (2) In the case of a site plan for a planned commercial development, planned industrial park development or residential cluster of 50 acres or conventional site plan for 150 acres or more, the Planning Board may extend the rights granted under final approval for such period of time, longer than two years, as shall be determined by the Planning Board to be reasonable, taking into consideration the number of dwelling units and nonresidential floor area permissible under final approval, economic conditions and the

*Arundhati "Arun" Bhosle, PE (NJ)
Geetha Vedanta Desikan

Good Afternoon Ms. Huber,

I am in receipt of your letter dated June 20, 2022. Please find attached meeting points, Geetha and I were planning to cover during the public comments period. Padma K. shouldn't come to the meeting for personal reasons.

Should you have any questions, please let me know.

Thank you and Take Care,

Arun

Hi Gay

I just received your letter asking if I would like to send my comments from the planning board meeting. I had actually sent them to you after the meeting, but sending them again now.

Kind Regards
Lynda

Subject: Lynda Levy comments for Town Council meeting 6/13/22

Hello Gay

Michael Stevens asked that I write up a summary of my comments at the Town Council meeting tonight (including the items I didn't get to). I am copying Tirza and Stacey since they also had comments on the State Planning Commission draft Warehouse Guidance that overlap with what I was planning to say.

Call to action: the Planning Board should put the review of the warehouse application on hold until the guidance has been fully reviewed and retrospectively implemented into the application, planning and review process for the Bridgepoint8 warehouse development.

Key points:

- The State Planning commission released draft warehouse guidance a few days ago. A link to a zip file with several relevant PDF files can be found on the following web page: [NJ DOS - NJ Office of Planning Advocacy](#)
- As (I believe) the largest pending warehouse development in the state, this is exactly the type of development this guidance is intended for. The application review and decision should be postponed to incorporate this guidance. While I have not had time to fully review the documents, a few items stood out to me in the pieces I was able to review. I have pasted below, and commented on some excerpts from the guidance that I believe this application and review should incorporate:
- **From the executive summary:** Wherever warehouse development happens, benefits and negative impacts will follow that must be carefully and equitably considered. There is no shortage of solutions that are good for communities, the environment, and the economy. Guiding such development effectively will require a whole-of-

government approach and commitment to long-range planning with a greater focus on the nexus between local and regional land use planning

- ***Aside from already required reviews at the state and county level, this is mainly a WW planning board review and is not part of regional planning despite the huge size of the development. The many solutions allowed for the land are not being seriously considered.***
- ***From the Traffic and Road Safety section:*** Traffic studies should extend beyond the site and analyze the anticipated truck routes between the project location and the closest highway access points, including the types of roadway infrastructure to be used and impacted, such as the capacity of bridges, intersections, interchanges, and highways and proposed truck routes. Because different classes of streets and roads are designed for different types and lengths of trip-making, not every road segment will necessarily be appropriate for every mode of travel. Truck traffic can present substantial safety issues. Collisions with heavy-duty trucks are especially dangerous for passenger cars, motorcycles, bicycles, and pedestrians. These concerns can be even greater if truck traffic passes through residential areas, school zones, or other places where pedestrians are common and extra caution is warranted. Whatever the level of review, analysis of all such traffic safety aspects should be a requirement of the developer. All such analyses, along with information as to upgrades needed to address impacts should be presented for review/approval. Given the public health and safety concerns, reviewing boards should ensure that proposed truck routes can be identified that are away from downtown centers, residential areas, historic districts, school zones
 - ***The current traffic study only looks at the roads close to the site, does not include key intersections such as Clarksville and 571 (by WWPHSS). West Windsor downtown as well as an elementary and high school are clearly impacted, and the Superintendent has school district have not been engaged to any significant degree. A much more extensive traffic study should be conducted, extending to key intersections between the site and the Turnpike passing through West Windsor as well as other relevant intersections in surrounding towns on the other side of the site***
- ***Also from the Traffic and Road Safety section:*** For larger warehouse proposals that are anticipated or likely to have negative impacts on adjacent or nearby communities, the hosting municipality should consider funding its own impact analysis (unless agreed by the applicant and/or funded as part of a redeveloper's agreement) to at a minimum, determine whether truck routes outside of municipal boundaries will negatively impact their neighborhoods, downtowns, historic areas, etc., and to send a copy of this evaluation to the neighboring municipality and county at least thirty days before the project is heard.
 - ***As far as I am aware, neighboring towns have not been engaged in this manner. This is the LARGEST warehouse proposal in the state so it certainly fits in this designation***
- ***From Community Involvement and Public Engagement: Adopt a good neighbor policy:*** Adopt a Good Neighbor Policy In addition to the Public Notice requirements pursuant to P.L. 1975, c. 291 (C. 40:55D-12), municipalities considering a warehouse siting are encouraged to adopt a "good neighbor policy" to notify and seek non-binding informal comments from adjacent and affected nearby municipalities, overburdened communities, county, and other relevant stakeholders both at the Master Planning and at the pre-application stages. For pre-applications, this is especially important for large projects that meet certain pre-established criteria (e.g., proposed impervious footprint above 200,000 square feet, or more than three stories in height). The policy could be incorporated into the subdivision and land development ordinance, a resolution, or as a memorandum of understanding between two or more municipalities and counties. In any case, when a municipality receives either a concept plan or preliminary and/or major site plan meeting certain established criteria, representatives from adjacent or nearby municipalities, affected counties, and relevant state agencies should be noticed and invited to provide comments through the duration of the application approval process. In addition, and as part of any good neighbor policy, municipalities are strongly encouraged to establish expanded public notice requirements to adjacent and nearby municipalities, particularly those sharing a proposed freight route, to increase transparency and provide meaningful opportunities for inter-municipal dialogue and public comments.
 - ***This proposed development is more than 27x the "above 200,000 sq ft" criteria for engaging with neighboring towns. The development should absolutely be put on hold and a comprehensive regional engagement process should be started before the review continues***
- ***From Community Involvement and Public Engagement: Community Engagement:*** Early and consistent community engagement is central to establishing good relationships between communities, lead agencies,

warehouse developers, and tenants. Robust community engagement can give lead agencies access to community residents' on-the-ground knowledge and information about their concerns, build community support for projects, and develop creative solutions to ensure new logistics facilities are mutually beneficial. Examples of best practices for community engagement include:

- Holding a series of community meetings at times and locations convenient to members of the affected community and incorporating suggestions into the project design.

- Posting information in hard copy in public gathering spaces and on a website about the Project. The information should include a complete, accurate project description, maps and drawings of the project design, and information about how the public can provide input and be involved in the project approval process. The information should be in a format that is easy to navigate and understand for members of the affected community.
- Providing notice by mail to residents and schools within a certain radius of the project and along transportation corridors to be used by vehicles visiting the project, and by posting a prominent sign on the project site. The notice should include a brief project description and directions for accessing complete information about the project and for providing input on the project.
- Providing translation or interpretation in residents' native language, where appropriate.
- For public meetings broadcast online or otherwise held remotely, providing access and public comment by telephone and supplying instructions for access and public comment with ample lead time before the meeting.
- Partnering with local community-based organizations to solicit feedback, leverage local networks, co-host meetings, and build support.
- Considering the adoption of a community benefits agreement, negotiated with input from affected residents and businesses, by which the developer provides benefits to the community.
- Creating a community advisory board made up of local residents to review and provide feedback on project proposals in the early planning stages.
- Identifying a person to act as a community liaison concerning on-site construction activity and operations and providing contact information for the community relations officer to the surrounding community
 - ***Essentially none of the above has happened throughout this planning process – for THE BIGGEST PROPOSED WAREHOUSE DEVELOPMENT IN THE STATE! Residents in town are just starting to wake up to this – not because they are not engaged citizens, but because they simply were not made aware in really any of the ways outlined above. And communication about the warehouses to those who did see it (e.g. on social media during the election) reassured residents that traffic would not impact West Windsor, which we now know not to be true. The planning board is not even allowing all interested residents to make comment on this development – restricting comment to one meeting only and no additional comments despite a previous promise that residents would be allowed to speak again.***

I have not read the documents related to environmental and other issues but I am sure there is more to highlight there.

I assume the developer (and perhaps the Planning board) will make the argument that this guidance was not in place (or drafted) when this application and review started. Again, this is THE LARGEST PROPOSED WAREHOUSE DEVELOPMENT IN THE STATE! I believe there is a clear mandate to apply this guidance to this development, that is not in a traditional warehouse location, and is at the intersection of several towns. Trying to brush off and ignore this guidance will disenfranchise West Windsor and surrounding town residents, businesses and officials. The guidance offers consultation from state experts in regional and state planning related to the many and complex issues regarding warehouse siting. West Windsor should take advantage of this. This is far too big a decision and impact for a few members of a local town planning board to make a decision on, in isolation, without the extensive engagement and studies advocated in the guidance.

There is no rush for a June 29th decision. Even with the current deadlines, the decision can at least be postponed to allow this guidance to be fully reviewed and an implementation plan considered. Please do not allow the planning board to rush to a decision, ignoring this important new guidance.

Thank you for listening and for your service to West Windsor.

Kind Regards
Lynda Levy

To: Gay Huber
Subject: Notes - June 13 Council Meeting

CAUTION: This email originated from outside the Township. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Gay,

Received your letter regarding an opportunity to forward notes for the Jun 13 meeting. The below is from memory and is not exact as I did not write my notes down; but these are my thoughts as I would have liked to convey them in that meeting. Please acknowledge receipt.

As a resident of West Windsor, I and many others, have concerns regarding our community well-being and welfare.

In general, before approving any large-scale projects, the township council and planning board must prove to us that the proposals will NOT be detrimental to us in terms of:

- Safety and health of ourselves and our children
- Increased Disease and lower longevity
- Worse/increased traffic on township roads, not just Clarksville or Village/New Village
- Increased injuries/death due to road accidents
- Loud Noise and significant light pollution
- Higher Risk of Flooding and the harm to the environment
- Storage of hazardous/incendiary/toxic materials in our township
- Implications on West Windsor Life and Lifestyle changes
- And also importantly, our Property Values – which also have an impact on township revenue

There should be NO rush to allow voting for approval of especially massive projects with huge negative implications for ourselves and our neighbors, if the above has not been explained fully to the satisfaction of the constituents of West Windsor. As individuals, we rely on you and your team of professionals, to study the above issues and help us understand the price we will pay for the tough decisions you plan to make, before you make them. If there are comparative options, it is incumbent on you to provide us how and why one option might be better for us, in terms of the above concerns.

If, in general, this has not been done satisfactorily, there should be no rush for the township council or planning board to push ahead with any decision. Delay is, and should be, a reasonable and acceptable thing to do, in the context of residents who feel uninformed as to the implications, and are fearful regarding their above legitimate concerns for any large project development.

Your primary job and duty is to ensure the well-being and welfare of our community – so please keep that in mind, as you think of the implications of your decisions, and the legacy you will leave. If the decisions you make result in less desirability of West Windsor to live in, or to move to, then in any reasonable person's view, you will have failed the best interest of our community.

I am sure nobody wants that.

Where this is a will there is a way. And for every problem, there is a solution. And it is up to us, collectively, with your leadership and with sufficient and consistent public outreach and engagement, to find those solutions, even if it means kicking the can down the road, for any project.

Thank You,

— Ajay Kaisth
20 Haskel Dr

West Windsor Planning Board on Fairness and Transparency, by John Mulcahy

Following the Bridge Point 8 Application hearings over the past few weeks, I am struck by the incredible lack of transparency and fairness on display. The West Windsor Planning Board held my family to a much higher standard than the behemoth Atlantic Realty, the applicant for the Bridge Point 8 Industrial "Park" project. The Planning Board proceedings have effectively withheld material information from the public and stifled the voices of community residents, while being so accommodating to big business, that one wonders if common sense guidelines even matter when money talks in this town.

I know these are strong statements. Let me explain, starting with a story about our experience with the West Windsor Planning Board. My wife and I have raised our three kids in West Windsor over the past 20+ years. Our youngest child, Marina, was born in 2003 with a partial chromosome deletion and, as a result, she has extraordinary special needs. Marina, our beautiful and courageous little girl, is non-ambulatory and has many additional and significant physical, developmental and cognitive disabilities. She is also among the most fragile of the medically needy population.

By 2014, as Marina was getting bigger it was becoming more and more difficult to carry her up and down the stairs for bed each night, and even more challenging getting her in and out of the bath tub. At the same time her medical needs were increasing, and it became clear to us that our home was no longer able to accommodate her wheelchair, gait trainer, feeding pump and IV pole, as well as all the other medical equipment she needs. We had a choice to make; we could either move or renovate our home. The choice was relatively easy. We love our home, our neighborhood and our community, so we decided

to renovate, adding 500 sq feet to accommodate a proper 1st floor bedroom and special needs bathroom, along with a deck and ramp for easy entry and exit.

In late 2014, we embarked on the variance approval process for a special needs' renovation for our home, and this application required substantial time, energy and paperwork for us to demonstrate to the township, and neighborhood, that our project would not negatively impact *the fabric and character of the community*. Among many other requirements, we had to take pictures of every home within 500 feet of our property. In addition, we had to send, via certified mail, the details of the renovation project, along with the date and time that the application would be discussed at the Planning Board meetings, to all neighbors within 200 feet of our property. Notification by certified mail was required as *posting on the township website was not deemed sufficient*. And for good measure, we also had to send those green certified mail 'stubs' (for each letter) to the township as evidence that we complied with variance application requirement.

As you can imagine, our project had absolutely no negative impact on the community, as we simply improved our house so we could continue to raise our family in our home. All went well enough with the Planning Board and the application was approved. All sounds good so what's the issue, right? Reflecting on our application, I support the idea of informing the surrounding community and ensuring they have a voice - even though it was difficult for us as we were also managing work, school schedules extra-curricular activities, and Marina's care, not to mention ongoing battles with the health insurance company.

Clearly and especially with such a large and impactful project, the planning board should ensure a level playing field, so where a proposed project that has a material impact well beyond its property line, there is a much greater

responsibility for the applicant *as well as our township officials* to ensure that the community is appropriately notified and engaged so the *fabric and character of our town is protected*, as is expected of local residents. It is especially true in the case of Bridge Point 8, considering that a project of that scale, adding hundreds of tractor trailers PER HOUR barreling down our local roads every day and every night is sure to have a dramatic, devastating and destructive impact on the entire community! Where was my certified letter? Why wasn't I given the same consideration afforded to my neighbors for so very much less?

What needs to be done now? In my view, there are 2 key actions:

- 1) The Planning Board must postpone the scheduled June 29 th vote on the Bridge Point 8 application and re-open the hearings, affording residents the opportunity to cross-examine the applicant and voice concerns.
- 2) The Planning Board must ensure appropriate transparency and fairness for the West Windsor community. They can accomplish this by requiring the applicant to provide timely notification (via certified mail) regarding the project scope, scale and impact, to every resident and neighboring community that will be impacted by the dramatic, dangerous and toxic traffic increase on Clarksville Road, Rte 1, Village Road and beyond.

The notification should also provide new dates for public hearings, with ample notice, so all impacted residents of the community are invited to participate fully. Unfair for the applicant? I do not think so. We are basically holding the Planning Board and the applicant to the same requirements that we faced when we had to send Marina's letter. Will this be easy? Maybe not, given the scope and scale of the project, the applicant would need to send letters via certified mail to the entire West Windsor community. Will it take time? Yes, it will, but so be it. It is much more important to get this right

because we will all be living with the consequences for decades to come, if we haven't left town.

Let's move the Bridge Point 8 deliberations out of the shadows and inform the people so they can have their say! Then our township officials must listen to the voice of the people!

For fairness and transparency, either do it right, or put the project up for a referendum on the ballot.

John Mulcahy, West Windsor Resident 2 Hereford Drive

Subject: RE: Interruption on Recording at June 13, 2022

CAUTION: This email originated from outside the Township. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I want to bring up serious concern at West Windsor from the development of new 7 warehouses at Clarksville road. Mayor Hemanth Merathe ignored the county road connections to the NHS which comes under federal law. He is simply talking about imposing conditions on Clarksville which he can't impose for a longer time. He is simply misleading people.

At the following link you can find more details. In short all major inter country US highways are connected with an inter-state highway which further connects with local highways which we called turnpike, and then it further connects to local county roads to further take all commercial vehicles to their destination. We are talking about stopping the county which can be possible if the county wants. If you look at this link USDOT is approved by US Congress, it means federal law protects the main highway's including county roads since all county roads are connected to the main highway. Hemant Marathe is simply trying to shut county roads and from Mercer county he is facing resistance so he announced a very bold decision to approve the project without county approval to put pressure on Mercer county. So look at how much of a dangerous game he is playing. Mercer county is resisting because they don't put all traffic pressure on Rt1. and in future in case of heavy congestion business can easily lift off from federal court.

Without considering all jurisdictions it's very dangerous to approve this project and simply saying we can control the traffic is not going to help as you look at the link USDOT is approved by US Congress which comes under federal jurisdiction.

Thanks,
Khurram

Subject: Statement from the Council Meeting on June 13
Attachments: West Windsor Plainsboro Regional School District (5715) 2021.pdf
Importance: High

CAUTION: This email originated from outside the Township. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Ms. Huber et al,

Thank you for allowing me to write my statement regarding the meeting on June 13. It was an awkward meeting for all of us, especially those on Zoom like myself.

I am very concerned that the Mayor has not publicly disclosed that he has an on-line grocery business that needs warehouses in Piscataway. The perception that he is giving to all the community is that he does not want to listen to his constituents and move forward with a project that it is doomed for failure. I personally would like to know why the Mayor has not disclosed that he is in the warehouse business and if he and some of his financial well off friends have anything to gain by approving warehouses in the most bizarre and unprofessional way.

In addition, the schools (and the Mayor as ex President of the BOE is aware of this) had to adjust the LRFP (Long Range Facility Plan) where it shows that the school enrollment is going down

Table 2: Enrollments

Grades	Existing Enrollments 2020-2021	District Proposed Enrollments 2023-2024
PK (excl. private providers)	64	55
Grades K to 5	3,734	3,398
Grades 6 to 8	2,338	2,185
Grades 9 to 12	3,173	3,048
Totals PK to 12	9,309	8,686

So why does the Mayor keep on feeding fear monger statements to the community unless he has something to gain?

Why the Mayor said that the June 29th record cannot be opened? According to what I investigated the Mayor does "not" have that authority. If he does, please show me where I can read about it. Please see below that Mayor's duties. It is clear that the Mayor has something to gain, and the Community has a lot to lose.

The Planning Board and Council have a fiduciary responsibility to the Community, not to the developers. You have sworn that you would be doing the right thing. Please do it!

The Mayor, is the Chief Executive Officer of the Township. The Mayor is elected to a four year term of office. West Windsor's nonpartisan Mayor-Council Form of Government, the Mayor exercises the executive power: municipality. Specific functions of the Mayor include enforcement of municipal ordinances, supervision of municipal departments, supervision of municipal property, appointment and/or removal of department heads, oversight of municipal budgeting, personnel, and purchasing procedures, preparation of the municipal operating and capital budgets, and negotiation of contracts subject to Council approval.

The Mayor serves as an ex-officio non-voting member of all appointive bodies of which he is not an official member. The Mayor may also attend Council Meetings and take part in discussions, propose legislation, and ordinances, subject to override by a two-thirds majority of the entire Council.

> Subject: Public comments from John Hinsdale at June 13, 2022 Council

> meeting

> Dear Members of Council and Mayor Marathe,

> For the written public record, below are the spoken comments I contributed online at last night's Council meeting. I checked against the audio available at https://www.youtube.com/watch?v=M9sMWS_PdXM&t=6700s and below is exactly what I said.

> -----

> The 15 million dollar revenue estimate for the warehouses, on which the Mayor and Martin Whitfield and Linda Geevers campaigned last Fall, was conspicuously absent from the Mayor's comments in his Township Address. There is compelling evidence that the Township conducted no analysis that led to that number prior to approving the warehouse rezoning and the 5.5 million square feet of space, as far back as November, 2020. To my knowledge, no analysis has been done past that, to this day. So everyone should know that. Interesting that was left out.

> Also, the Mayor pointed out in his comments that there would be no resumption of the public comment at the next Planning Board meeting for the warehouses. The Mayor provided no reason as to why public comment could not resume. And since the Mayor -- and there is no good reason -- so since the Mayor left out that reason, I'll give the reason to everybody. The reason the Mayor and the Planning Board will not resume public comment is that they know, that if they did resume public comment, many people would come with comments in opposition to the warehouses, expressing concerns and issues. The Mayor and the Planning Board's approach to addressing those issues is to prevent those issues from being expressed by the residents, by keeping comment closed, and not resuming the comment at the next meeting. That is why. There's no other reason that they're doing that, and residents should be aware of that.

> It's unfortunate, and a little bit pathetic, that the Mayor and Planning Board are approaching the problem by squelching the voices of the residents. It really runs counter to the traditional American philosophy of people having a voice. I'm not so sure the Mayor understands what it means to govern a public body here in America. And I wish he would maybe make up for his mistake in closing the public comment by allowing it to resume at the next meeting. Or at least explain why public comment will not resume at the next Planning Board meeting.

> -----

> Sincerely,

COUNCIL MEMBER COMMENTS

Mr. Stevens reported he was honored to present the Kenny Baker Award to Kap Carter of West Windsor Plainsboro High School North. He noted the Memorial Day Parade and Ceremony was great and he placed his father and father in-law stars on the Centennial Memorial. Mr. Stevens noted anyone can place a star of a service member who passed on the memorial. He encouraged residents to go out on the Township web-site and see the stories about each of the stars. He reminded everyone that Flag Day is tomorrow.

Ms. Mandel thanked the Mayor for his State of the Township address this evening. She encouraged everyone to review the Planning Board documents which are posted on the Township web-site for each application before Planning Board. Ms. Mandel thanked everyone involved in the Memorial Day Parade and Ceremony and noted she too placed a star on the Centennial Memorial for her father who served. She noted the following events she attended: 5/28 West Windsor Bike Fest; 6/2 Autonomous Vehicle Demo at West Windsor Senior Center. Ms. Mandel also reminded everyone to attend the Dive Into Summer event for the Historical Society of West Windsor.

Ms. Geevers thanked all the residents who attended this evening and spoke. She noted the next Planning Board meeting for the Bridgepoint application is scheduled for Wednesday, June 29th at 7:00 p.m. Ms. Geevers sent out congratulations to all who are graduating. She attended and thanked everyone involved in the Memorial Day Parade and Ceremony. Ms. Geevers advised she also attended the Autonomous Vehicle demonstration at the Senior Center.

CHAIR/CLERK COMMENTS

President Gawas thanked everyone involved in making the Memorial Day Parade and Ceremony a success. She noted she attended the ceremony out front of the Municipal Building by the Mayor for Mom's Demand Action on June 3rd. President Gawas reminded everyone about "Dive Into Summer" being held at WaterWorks as a fund raiser for the Historical Society of West Windsor. She thanked all the residents who attended this evening and spoke about the proposed Bridgepoint 8 development.
